# Aural 30 Communication System

Simplifying communication for small enterprises without relinquishing features

### *Competitive Technology*

Aural Networks extends leading edge technology and features to the small business. The Aural 30 includes many standard features that are optional in most PBX systems available today including integrated digital audio Auto Attendant and Remote Management. The Aural 30 VoIP option allows the business to transcend borders.

### *Expandable*

The Aural 30 scales with a business from an 8-port system to a 32-port system by adding 4-port CO line or extension cards to the existing chassis.

### *Easy Install, Set Up, and Usage*

All Aural PBX systems are built with our customers in mind. The systems are easy to install, configure, and operate.

The Aural Networks Configuration Software provides a graphical user interface for straightforward installation. The Configuration Software also includes the Aural Assistant: a simple guide to customize the Aural 30.

Another key feature providing superior support for customers is Remote Configuration. Off premises support through Aural's Remote Configuration permits dealers to easily manage their clients' systems through the Internet.
